I believe allowing the use of cell phones onboard aircraft during flights would enable terrorists to coordinate plans of attacks with
those on the ground. Makes flight attendants become onboard police and takes away from their other safety duties. It will add to an already stressful cabin environment. There is no proof that cell phones won't interfere with aircraft instrumentation/ communication.
A bunch of loud passengers talking on their cell phones will anger those who don't want to listen to their lengthy business calls!!!
Allowing cell phone use on planes is a "BAD IDEA"!!!!
